## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-8, drawn to a chimeric plant promotor, wherein the promoter is a combination of the ferredoxin and rolD promoters.

Group II, claim(s) 1- 3 and 9-15, drawn to a chimeric plant promoter, wherein the promoter is a combination of the plastocyanin and the S-adenosyl-methionine-1 promoters.

2. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Claims 1 and 2 are drawn to a chimeric plant promoter comprising a minimal promoter and transcriptional activating elements which have complementary pattern and level of transcription and does not exhibit absolute tissue specificity. Gelvin et al. disclose a chimeric plant promoter comprising transcriptional activating elements from the mas and ocs promoters linked to a minimal promoter. The expression patterns are complementary, as mas is weak in leaves and

strong in roots, whereas the ocs promoter is strong in leaves and weak in roots. Therefore, the subject matter of claims 1 and 2 is not free of the prior art and, therefore, a special technical feature does not link the claims of the instant application.

Further, the claims of Group I and Group II are not linked because the two groups are drawn to promoters comprising different promoter elements. For example, the promoters of Group I comprise elements of the ferredoxine and rolD promoters, which are not required for the promoters of Group II and the promoters of Group II comprise elements of the plastocyanin and the S-adenosyl-methionine-1 promoters, which are not required for the promoters of Group I, and, therefore, are not linked by the same technical feature.

The subject matter of claims 1-3 are generic to groups I and II and will be examined with the elected Group only to the extent that they read on the subject matter of the elected Group.

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
